

Manual Testing Report	
Project Name:	Quality Assurance Testing for B2B Marketplace for Buyers
Date:	June/18/2024
Tester:	Gabriel Samuel
Device:	System Model HP EliteBook 840 G4  OS Name: Microsoft Windows 10 Pro  Browser: Google Chrome and Windows Edge

Test Cases Executed

Test Case ID	Description	Steps Executed	Expected Results	Actual Result	Pass/ Fail
TC001	User Registration	1. Navigate to Registration Page  2. Fill in details  3. Click Register	User should be registered successfully	User registered successfully	Passed
TC002	Login with valid credentials	1. Navigate to Login Page  2. Enter valid credentials  3. Click Login	User should be logged in successfully	User logged in successfully	Passed
TC003	Edit user profile	1. Login  2. Navigate to Profile	User details should be updated successfully	User details updated successfully	Passed

		Page 3. Edit details  4. Save changes			
TC004	Logout	1. Login  2. Click Logout	User should be logged out	User logged out successfully	Passed
TC005	Password recovery with valid email	1. Navigate to Login Page  2. Click Forgot Password  3. Enter valid email  4. Submit	Password recovery email should be sent	Password recovery email sent	Passed

## Defects

Defect ID	Description	Screenshot link	Location	Severity	Steps to reproduce	Suggested Fix
D001	No direct link to certification details, which could help users verify the claims	 0001...	Under various producer entries	High	Open the page and view the producer entries	Add links to more information about each certification
D002	Typically replies in more than a week" appears for multiple entries without specification of exact	 0001...	Under various producer entries	Low		Specify an exact time frame (e.g., "Typically replies in 10 days")

	time frame					
D003	Cards not responsive unless when tapped on on the "Connect" button	 0001...	Under various producer entries card	High	Open the web page and try to tap on the cards	Make the entire card clickable while maintainin g the individual functionaliti es of elements like the "Connect" button
D006	Clicking on the "All Suppliers" tab on the home screen does not produce any visible results while on the Homepage . The tab appears to load but remains unresponsi ve, failing to display expected content/fun ctionality.	 0001...	Under various producer entries card	High	1.Navigate to Home page  2.Locate "All Suppliers" Tab  3.Click on "All Suppliers" Tab  4.Observe Behavior	The best fix involves ensuring proper functionalit y for loading and displaying the content.
D007	When clicking on the "Chat" box and subsequen tly selecting the display option, the expected	 0001...	On the Chat screen	High	1.Navigate to Home Screen  2.Locate "Chat" Box  3. Click on "Chat" Box	Investigate and adjust the positioning logic of the display option to ensure it appears correctly at

	<p>effect appears behind the chat box when the browser is at the default zoom level of 100%. However, when the zoom level is reduced to 90% or lesser, the display option works as intended, appearing in the correct position.</p>				<p>4. Locate Display Option</p> <p>5. Click on Display Option at 100% Zoom and 90% or lesser</p>	all zoom levels.
	<p>When a user scrolls past the "All Suppliers" heading, the "Home Page" link becomes inaccessible, requiring the user to scroll back up multiple times to see it again. This affects user navigation and overall experience across all screens.</p>	<p>0001...</p>	On all the Pages	High	<p>Locate all the pages and try to scroll below every page</p>	<p>Implement a sticky or floating navigation bar that remains visible and accessible as the user scrolls down the page. This ensures that the "Home Page" link, along with other essential navigation elements, is always available without the need for</p>
